SUMMARY

I am a Frontend Developer with a strong foundation in HTML, CSS, JavaScript, and React.js. My experience spans building responsive web interfaces with reusable components, focusing on creating functional UIs that utilize clean code and practical features. I specialize in implementing interactive features, handling state management, and integrating browser storage for better user experience.

EDUCATION

Bachelor of Arts (Honours in English)

BBMKU University

📅 08/2019 - 06/2022

LANGUAGES

Hindi
Proficient

English
Advanced

Git

GitHub

PROJECTS

Music App

A music app to play songs, create playlists, and manage favorites

- Play, pause, next, previous controls with smooth audio playback
- Create, rename, delete playlists using localStorage
- Voice search for quick access
- Like songs and access them from a dedicated Favorites section
- Shuffle and repeat for flexible listening
- Mini player stays visible with full controls

E-commerce Website

An e-commerce site for seamless product browsing and cart management

- Browse products by category or search with dynamic filtering
- Add/remove items from cart with quantity control and Redux state
- View detailed product info with smooth Framer Motion animations
- Dark mode, toast alerts, and responsive design with sidebar navigation

Note App

A Note application that allows users to manage their notes efficiently

- Create, edit, pin, delete notes in a clean UI
- Long-press menu for quick note actions
- View notes in animated full-screen modal
- Trash bin page to restore or permanently delete notes
- Dark mode and localStorage support
